

It's time to
rethink our
plastic use

How Long Does It Take For Plastic To Breakdown

Plastic has an inability to decompose because it is made of toxic chemicals. Instead it photodegrades, becoming microplastics that release toxins and continue to pollute the environment.

Below is a list of everyday items and their average biodegradation times.

CIGARETTE FILTER

10 Years

COFFEE CUP

50 Years

ALUMINIUM CAN

200 Years

DISPOSABLE DIAPERS

400+ Years

PLASTIC GROCERY BAG

1000 Years

POLYESTER SHIRT

50+ Years

DRINKING STRAW

200+ Years

PLASTIC BOTTLE

450+ Years
